

Question Sets for MAE126B

Please provide your answers in the following boxes.

* Required

First Name *

Last Name *

What is YOUR team number? *

For team number see: <http://maeresearch.ucsd.edu/kleissl/126B.html>

Title *

The title should be descriptive yet short.

Abstract *

The abstract should be written concisely, summarize the problem being addressed, the methods, and the results of your design / model / experiment.

1. Introduction *

Is the motivation for the project clear? Are project definition, background, review of existing solutions, task description present and clear?

2. Methods *

Is this section well structured? It is clear how the experiment / design / model will be conducted? Is the description of the theory adequate? Are team assignment and work schedule reasonable?

3. Results *

Are the results clearly described and well illustrated? What other results should be obtained?

4. Discussion / Conclusions *

Are the conclusions supported by the data? Is the discussion sophisticated (reference results against literature, display technical knowledge)?

References *

Are the references numerous and do they follow a consistent and accepted format?

**Appendix ***

Does the appendix supply all the extra information needed to make the report clearer and add more depth to certain sections if needed?

**Figures and Tables ***

Are the figures and tables on the report helpful, provide good insight and are clearly labeled? Please Provide an example of the best and worst figure on this report. Are the captions sufficient?

**Overall comments ***

Provide comments on structure, language, etc.
